

Jr. Kindergarten Learning Centers

Children work cooperatively in groups to reach developmental milestones and school readiness through exploring, experimenting and repetition.

Learning Center

Description

Music and Movement Center

Familiarizing children with instruments and dance helps improve coordination, tone sensitivity, and develop a sense of rhythm.

Arts Center

Teaching children texture, color, design, and motor control.

Reading Center

Books enhance communication, listening skills and self-control. Literacy and early reading skills start here

Math Center

Building blocks and manipulatives help children understand number concepts and facts.

Play Center

Sensory wet and dry allows children to experience mixture, touch, consistency, measurement, and enhances math and science experiences.

Dramatic Play Center

Dramatic play is all about the world of pretend, self-identifications, family and community. It permits children to fit the reality of the world into their own interests and knowledge.

Computer Center

Children learn the importance of technology through “hands-on” learning with computers.
